

# Volunteers Needed for a Research Study

## Are you someone living with, or caring for someone living with, one or more chronic conditions?

If **Yes**, you may be eligible to participate in a Research Study to inform the design of **digital tools to support care delivery at home**.

We are developing digital health tools to better connect patients living with chronic conditions with their healthcare team. We are looking for volunteers to participate in:

- **1 interview** to discuss their experiences transitioning from, or caring for someone transitioning from, hospital to home after a hospitalization and how technology can be a part of their follow-up care

**and / or**

- **2 focus-group sessions** to explore different ways of receiving follow-up care or caring for someone receiving follow-up care

**and / or**

- **1 session** to give feedback on the digital tool being developed

All information provided will be kept confidential.

**You will be reimbursed for your time.**

All activities can either be conducted remotely on a secure videoconferencing platform or in-person at the University Health Network in Toronto. If you are interested in participating in this study, and would like further information, please contact **Kate Szacun-Shimizu** at [kate.shimizu@uhn.ca](mailto:kate.shimizu@uhn.ca)

Please note that the security of e-mail messages is not guaranteed. Messages may be forged, forwarded, kept indefinitely, or seen by others using the internet. Do not use e-mail to discuss information you think is sensitive. Do not use e-mail in an emergency since e-mail may be delayed.
